

THE 1Touch FINGERPRINT DOOR LOCK

BIOMETRIC SOLUTIONS FOR HOME AND OFFICE APPLICATIONS

**SINGLE LATCH TUBULAR LOCK WITH
USER MANAGEMENT CAPABILITY!**

Where Home Security Begins!

For the price 1Touch Lock is the most sophisticated and well-constructed fingerprint lock on the market. It provides unrivaled safety, security and convenience to any home or office. 1Touch lock features a sliding front cover which activates the scanner, allowing quick and convenient keyless entry. The slide design allows for hands free door access and extra long battery life. 1Touch will accommodate up to 150 Fingerprint and PIN number users. 1Touch does not require PIN + FINGERPRINT enrollment like most models on the market. Unique to this door lock is the ability to manage your users. You can easily delete an individual user without having to delete "all users". This feature is important for an environment where different people might have access to your home or office.

Stylish and expertly crafted, this fingerprint door lock is perfectly suited for indoor or outdoor use. The contemporary design makes 1Touch a beautiful addition to any interior or exterior doorway. 1Touch incorporates a cutting-edge optical sensor, which provides excellent scanning reliability. The lock is made using a high impact body with state of the art "nanotechnology" surface. This will prevent your lock from corrosion, weathering and fading. 1Touch Lock is also simple to install. It can easily replace any standard tubular door lock you currently have in place. There is no need to alter the existing door as it comes with a field adjustable 2 1/8 and 2 3/4 single lock latch. For installation all you need is a screwdriver. No other product available on the market today can match 1Touch features, ease of use, and warranty.
