

THE BioAxxis BD1 BIOMETRIC DEADBOLT

BIOMETRIC SOLUTIONS FOR HOME AND OFFICE APPLICATIONS

THE SECURITY OF A DEADBOLT...
THE EASE OF BIOMETRICS!

KEY FEATURES

- ❑ Quick and Convenient Keyless access
- ❑ Easy to program and operate
- ❑ Up to 30 users (each user can scan fingerprint 2 times for total of 60 stored template)
- ❑ Elegant and contemporary appearance
- ❑ Non-Handed - will fit any left or right handed door
- ❑ Weatherproof - Fully resistant to rain, snow, temperature extremes, humidity, UV and dust. No other biometric deadbolt can make these claims
- ❑ Sliding weather cover triggers the sensor to power "ON" automatically
- ❑ Sliding weather cover also triggers deadbolt to re-engage (no tricky buttons to push or PIN Codes to recall)
- ❑ Five pin tumbler re-keyable KW1 keyway, making it easy to have keys made or the keyway replaced.
- ❑ Includes three nickel plated brass keys
- ❑ 2 Year Warranty - as compared to most locks with a single year warranty

Where Home Security Begins!

The BioAxxis® BD-1 biometric fingerprint deadbolt was designed in the United States by one of our strategic partners. With input from thousands of US consumers as well as multiple well-respected US locksmiths and security firms, we have created a deadbolt lock that truly accomplishes a unique blend of beauty and unparalleled security. We sourced the highest quality components for the BD1, redefining the standard in fingerprint lock construction. Its rugged "ANSI" equivalent mechanic construction makes the BD-1 100% weatherproof. It uses a solid steel deadbolt with a case-hardened roller and features a protective slide cover for the scanner, which keeps it safe from the elements. In addition to all these features it also comes with a 2 year warranty.

The BD-1 is the first biometric dead bolt designed with a 5 pin Tumbler KW1 keyway. This innovation makes it easy to replace the key core, so you can have additional keys made for the lock. The fingerprint technology allows access for up to 30 users. It also has the added convenience of easy installation. There is no altering of your door during installation. This lock is a perfect fit for all residential applications. The BD-1 is currently available in three finishes; satin / brushed chrome, polished brass and oil-rubbed bronze.

4 AA Battery pack operates with "Low battery alert" & has a non-volatile memory. Will not delete stored fingerprints (even if batteries expire).
